

SO2 NAAQS Exceedances Caused Solely by Rush Island Based on Modeled Actual Emission Rates*

*Actual emission rates are the CEMS 95th percentile rates used in DNR's first round modeling. Design values include background of 23.58 ug/m³ and were modeled using the most recent DNR met data for Jefferson County.

SO2 Design Values (ug/m³)

196.5 - 200	211 - 220	231 - 240	251 - 260	271 - 280
201 - 210	221 - 230	241 - 250	261 - 270	281 - 290
